Presentation Type Descriptions

Pre-Meeting Institute (PMI)

Institutes are full- or half-day sessions that provide opportunities for intensive training on topics integral to the conference program, presented by leaders in the field.

Symposium

Session that includes a group of 3-4 sequential presentations, each related to the overall theme of the symposium.

Panel Presentation

Session that includes 3-4 participants discussing a common theme, issue or question. Panels may include short statements during which panelists outline diverse or similar approaches to the same question. Panels are typically more interactive than symposia, involving active discussion among the panelists.

Workshop Presentation

Instructional session that aims to help participants increase their understanding and skill in a particular area of interest. Such sessions may include active involvement of the audience.

Presentation Level

All presentations designate the knowledge/skill level required of the participant as either: Introductory (I), Intermediate (M) or Advanced (A). These should be used as a general guide only since attendees have very diverse educational and professional backgrounds.

Introductory (I): Presentations that all participants (including undergraduate students) with any appropriate background will be able to fully comprehend and/or appreciate. Presentations will discuss concepts that are considered basic skills/knowledge for those working in the field.

Intermediate (M): Presentations that participants may more fully comprehend/appreciate if they have at least some work experience in the topic to be discussed.

Advanced (A): Presentations consisting of concepts requiring a high-level of previous educational background, or work experience, in the particular area/topic to be discussed as well as being most geared for specialists and those in advanced stages of their career.

Case Study Presentation

Sessions that use material from a single or a set of cases to illustrate clinical, theoretical or policy issues. These sessions may involve the audience in discussion of the case material presented.

Paper Session

Individual presentations of no more than 15 minutes on a topic related to traumatic stress, typically including the presentation of research data.

Poster Session

Individual presentation in a poster format on a topic related to traumatic stress, typically including the presentation of research data.

Media Presentation

Session involving presentation of a segment of film, video, music, drama, literature, artwork, or other forms of media relevant to traumatic stress, along with discussion.
